

## Special Issue

# The Diagnostic Value of Cerebrospinal Fluid

### Message from the Guest Editors

Cerebrospinal fluid (CSF) is in direct contact with the brain and extends into the spinal cord. The main functions of CSF are to provide physical stability for the central nervous system (CNS), to actively regulate the CNS by supplying hormones and neuropeptides to it, and to remove various CNS metabolites. Due to its direct contact with the CNS, CSF is of great diagnostic importance. Thus, it can serve as a representative for the state of health of the CNS and provide important information on neurological diseases and disorders, which include for instance dementias (e.g. Alzheimer disease and Parkinson's disease), cerebrovascular diseases (e.g. stroke), neurotraum (e.g. spinal cord injury and traumatic brain injury), multiple sclerosis, neuroinfections and brain tumors. In this Special Issue, we welcome contributions that provide an update on a wide range of topics in CSF diagnostics (e.g. milestones in CSF analysis or the current diagnostic standards). However, this issue also focuses on new and innovative approaches that are important for CSF-based diagnostics.

### Guest Editors

Dr. Katalin Barkovits

Medizinische Proteom-Center (MPC), Ruhr-University Bochum, Bochum, Germany

Prof. Dr. Katrin Marcus

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
