

Special Issue

Cervical Cancer Screening, Management, and Prevention

Message from the Guest Editor

In this Special Issue, we would like to focus on selected patients suffering from forms of cervical cancer that are characterized by the dynamics of increased progression. Among cervical cancer patients, those with increased disease progression can be seen in everyday practice. Consequently, the cause of this dynamic progression has become a subject of interest for researchers. These individuals often do not receive adequate therapy, although recommendations for the treatment of cervical cancer patients are precise and widely accessible. Furthermore, such patients have a higher risk of early relapse and an overall worse prognosis.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
