Coronary Heart Disease Imaging

Message from the Guest Editor

Novel non-invasive and invasive modalities have enriched the field of coronary imaging. Imaging modalities for diagnosis and treatment of coronary artery disease comprise coronary CT angiography, conventional angiography, intravascular ultrasound (IVUS), near-infrared spectroscopy (NIRS) and optical coherence tomography (OCT). Developments in coronary imaging are likely to result in improved diagnosis in patients with coronary artery disease. The use of these tools as adjunct methods to guide medical therapy or percutaneous coronary interventions is likely to improve clinical outcomes. Moreover, the advent of artificial intelligence may further increase the value of coronary imaging modalities. The Special Issue of *Diagnostics* with a focus on “Coronary Artery Disease Imaging” invites submission of the recent advances, current possibilities, and emerging techniques in coronary imaging.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
