Ultrasound Technologies in Clinical Medicine: Recent Advances in Gastroenterology

Message from the Guest Editor

The past 20 years have seen remarkable advancements in ultrasound technology, such as endoscopic ultrasonography, contrast-enhanced sonography, ultrasound elastography, ultrasound attenuation imaging, and artificial intelligence (AI)-aided diagnosis. Ultrasound has many diagnostic advantages compared with other diagnostic modalities (CT, MRI), including real-time visualization, non-irradiation, non-renal toxicity. These technological advances have yielded remarkable progress in diagnostic confidence, especially in gastroenterology. However, on the other hand, a sufficient knowledge of US physics, US technologies used in each method, and a skillful manipulation of machines is needed to avoid misinterpretation of obtained results. The aim and scope of this Special Issue is to explain the basic technologies used in current ultrasound examinations to clarify the diagnostic benefits and limitations in each of the aforementioned ultrasound methods. We will also enumerate some important points for avoiding diagnostic errors encountered frequently in clinical settings.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
