Diagnosis and Management of Vascular Diseases

Message from the Guest Editors

This Special Issue delves into the intricate mechanisms underlying vascular disorders, showcasing cutting-edge diagnostic techniques, ranging from non-invasive imaging to biomarker analysis. We examine the prognostic value of these tools in predicting disease progression and tailoring individualized treatment strategies. With a focus on evidence-based approaches and emerging research, our aim is to empower healthcare professionals with the knowledge they need to optimize outcomes for patients facing the burden of vascular diseases.
