Endoscopy-Guided Orthopedic Surgery

Message from the Guest Editor

Endoscopy-guided orthopedic surgery represents a significant leap in precision and minimally invasive treatment options. This technique allows surgeons to visualize the internal structure of joints and the spine, providing detailed information on the nature and extent of injuries and diseases. By combining endoscopic technology with surgical tools, orthopedic surgeons can perform targeted interventions with minimal trauma to surrounding tissues and enhance post-operative recovery. The development of advanced endoscopic techniques plays a pivotal role in optimizing patient outcomes and ensuring treatment success.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
