Latest Advances in Diagnosis and Management of Skin Cancer

Message from the Guest Editor

Skin cancer incidence is on the rise worldwide, highlighting the importance of this condition as a public health concern. Over the past decade, technological advancements have allowed for more accurate and earlier skin cancer diagnoses. Many novel therapeutics have also been introduced to treat or manage rare and advanced skin cancers. We invite researchers, clinicians, and experts in the field to contribute to this Special Issue focusing on the latest advances in the diagnosis and management of skin cancer (melanocytic tumors, keratinocyte tumors, soft tissue tumors, sarcomas, lymphomas, etc.). Papers discussing advances in diagnostic tools for skin cancer detection via immunohistochemistry, molecular techniques, novel biomarkers, imaging tools, machine learning, and genetic analysis, among other tools, are encouraged for submission. In line with the drive toward precision medicine, we also encourage article submissions on new or novel targeted therapies for skin cancers.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
