

## Special Issue

# New Diagnostic Technologies in Urological Care

### Message from the Guest Editors

This Special Issue aims to investigate new technologies and scenarios in the field of urology. This Special Issue invites original research articles, review papers, and clinical studies that enrich our knowledge about the newest technologies available for an early and accurate diagnosis of pathological conditions in urology. We encourage submissions focusing on topics such as urologic cancers, prediction of surgical challenges, and the use of technology for patient-tailored clinical follow-ups. To ensure the highest quality of publications, we kindly request that authors refrain from submitting mini-reviews and case reports for this Special Issue. Instead, we seek in-depth research articles and comprehensive reviews that present novel findings and insights into “uro-technology”. By bringing together leading experts and researchers in the field, this Special Issue aims to foster interdisciplinary discussions and promote collaborations to address the pressing issues faced in urology. We believe this collection of articles will serve as a valuable resource for clinicians and researchers involved in improving their clinical practice.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
