Game-Changing Concepts in Reproductive Health

Message from the Guest Editors

The published research juggernaut is largely occupied by relatively incremental studies building upon an existing foundation which flood the literature and only advance the field in small increments. Such studies often predominate for several years. Periodically, however, there are game-changing discoveries that advance our understanding onto a new playing field, often with new rules, and which force everyone to think differently to how they did the day before. It is these sentinel discoveries that make careers and can have highly leveraged implications for both individual patients and public health. In women's reproductive medicine, the logarithmic growth of molecular techniques and accompanying bioinformatics has translated into rapid changes in our appreciation of fetal, neonatal, childhood, and adult diagnoses and set the stage for new therapies. This Special Issue seeks research articles and reviews exploring such game-changing discoveries and how they are presented, argued, resisted, and ultimately translated and implemented into actual patient care.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
