

Special Issue

Impact of Deep Learning in Biomedical Engineering

Message from the Guest Editors

Understanding and using complex, high-dimensional, and heterogeneous biological data continues to be a major challenge in the transformation of healthcare. Feature engineering is generally required in traditional data mining and statistical learning techniques for building prediction models to extract useful and more robust features from data. New efficient paradigms for creating end-to-end learning models from complex data are provided by the most recent advancements in deep learning. The aim of this Special Issue is to examine the state-of-the-art deep learning techniques employed for different problems in the field of biomedical engineering. We invite authors to contribute original research articles and reviews related to deep learning for biomedical engineering. Articles that examine cutting-edge deep learning methods will be highly appreciated.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
