

## Special Issue

# Diagnosis of Polycystic Ovary Syndrome (PCOS): State-of-the-Art and Open Questions

### Message from the Guest Editor

While the criteria for diagnosing PCOS seem well established and easy to follow, many questions remain open, and problems may arise in clinical practice. The main issues regard:

- Laboratory problems in establishing androgen excess;
- Clinical signs that may determine diagnosis of PCOS when circulating androgen levels are normal;
- Technological progresses in ovarian ultrasound that have modified the sonographic criteria for diagnosing polycystic ovaries;
- Role of AMH measurement in diagnosis of PCOS;
- Clinical and endocrine differences between PCOS phenotypes;
- Differences in body weight and insulin production inside the same PCOS phenotype;
- Controversies around the criteria for making diagnosis of PCOS during adolescence.

All these issues will be discussed by well-known experts (often presenting two different opinions) and, at the end, a purpose for updated criteria for diagnosing PCOS will be presented.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
