Advances in Diagnostic Dermatopathology, from Histopathologic to Molecular Studies

Message from the Guest Editor

Dermatopathology is the most sophisticated area in anatomic pathology; we can easily observe superficial skin lesions using our eyes without the need for an invasive approach and can easily compare gross configurations to microscopic findings. Meanwhile, dermatopathology has recently focused on the study of various cutaneous diseases at molecular biology level. Additionally, dozens and dozens of cutaneous diseases are now being well-researched—melanocytic nevus and malignant melanoma, psoriasis, pemphigus, allergic dermatitis, autoimmune diseases, skin infections, and so on. Here, we invite investigators such as dermatologists and pathologists to contribute original research articles as well as review articles that reveal novel findings of diagnostic dermatopathology such as diagnosable new morphological (histopathologic) findings, immunohistochemical and immunofluorescent markers, and molecular techniques. We also invite articles that discuss prognostic examinable factors in skin tumors and intractable dermatitis. Relevant case reports will be warmly acknowledged.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
