Advances in Diagnostics of Skin Diseases

Message from the Guest Editor

The diagnosis of inflammatory skin diseases and cutaneous malignancies presents special challenges to physicians and laboratory professionals. This Special Issue aims to provide a platform for the research community and professionals to demonstrate solutions and address research challenges in the diagnosis of skin diseases and cancers. This Special Issue aims at publishing high-quality manuscripts covering new research on topics related to the advanced diagnostic methods of dermatologic conditions and malignancies. Proposals of novel diagnostic markers, methods, laboratory techniques, and clinical criteria are welcome. Animal experiments with the potential to lead to clinical and laboratory diagnosis and review articles are also welcome.
