Advances in the Diagnostics of Endometriosis

Message from the Guest Editor

Endometriosis is a commonly occurring gynaecological disorder that may cause pelvic pain and subfertility or infertility. The diagnosis of endometriosis is pathologically confirmed by the ectopic presence of endometrial-like epithelium and stroma. Although several pathogenic theories have been suggested, the exact underlying mechanisms of endometriosis still remain unclear. The long-term management of endometriosis-related symptoms and recurrence after surgery also remains a challenge. Understanding the endometrial cellular expression of certain genes and proteins may result in the improved diagnosis and treatment of endometriosis. To expand our clinical knowledge on endometriosis, a new insight into the molecular and genetic approach for diagnosis and evaluation is required. So, we would like to discuss current advances in the molecular mechanisms of endometriosis in this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
