Gastrointestinal Surgery: Diagnosis and Management in 2025

Message from the Guest Editor

Gastrointestinal surgery is an evolving field of interest for clinicians and researchers, especially in emergency and oncology settings. In emergency gastrointestinal surgery, the importance of correct and rapid diagnosis is highly dependent on clinical experience and the volume of cases treated. Improved treatment protocols for patients with locally advanced or metastatic cancer are currently the subject of multidisciplinary research. The predictive approach aimed at identifying the precise tumor staging and indication for personalized therapy is a constantly evolving field of interest. The selection of the most appropriate diagnostic program and treatment regimen must be carefully established based on multidisciplinary expertise that takes into account the patient's specific risk, length of stay, and functional recovery. For many gastrointestinal diseases, new digital technologies can be applied for both diagnostic and therapeutic-surgical purposes. For this Special Issue, we invite clinical and experimental research focused on diagnosis and treatment adjuvant to gastrointestinal surgery.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
