Personalized Diagnosis, Prognosis and Treatment of Kidney Diseases

Message from the Guest Editor

Personalized diagnosis, prognosis and treatment of kidney diseases involve medical approaches to individual patients based on their unique characteristics, including genetic profiles, biomarker levels and specific disease manifestations. The personalized approach aims to optimize patient outcomes by providing targeted and effective interventions. Innovations in precision medicine, including molecular diagnosis and targeted therapies, are being explored for specific kidney diseases. Personalized approaches offer the potential for improved disease control, reduced treatment-related complications and predicted accurate prognosis for patients with acute and chronic kidney diseases. The purpose of this Special Issue is to explore the new frontiers in the personalized diagnosis, prognosis and treatment of kidney diseases, as well as the integration of these new perspectives for the benefit of patients.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
