Frontier of Endocrine Tumor Imaging

Message from the Guest Editors

Endocrine tumors originate from glands or cells that produce hormones. These include thyroid, adrenal, pituitary, and cells/glands of the neuroendocrine system. Endocrine/neuroendocrine tumors can be called by different names depending on where they are located in the body, or from which endocrine cell/gland they arise. Imaging methods may be extremely useful for diagnosis, monitoring, treatment response assessment, and for obtaining prognostic information in patients with endocrine and neuroendocrine tumors. Imaging methods for assessing endocrine/neuroendocrine tumors are extremely varied, including conventional techniques of morphological imaging (ultrasound, computed tomography (CT), magnetic resonance imaging (MRI)), endoscopic explorations, and functional imaging techniques (positron emission tomography (PET) and scintigraphic methods). This Special Issue aims to gather articles concerning imaging techniques in endocrine/neuroendocrine tumors.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
