

## Special Issue

# Advanced Endoscopic Imaging in Gastrointestinal Diseases

### Message from the Guest Editor

This Special Issue focuses on the advanced imaging modalities in the field of gastrointestinal (GI) endoscopy. The remarkable development of GI endoscopy in recent years has been due to the development of image enhancement endoscopy (IEE). Currently, most popular advanced imaging technologies utilize a combination of magnifying endoscopy and IEE. Particularly, narrow-band light observation, such as narrow band imaging (NBI) or blue light imaging (BLI), has improved the diagnostic accuracy of GI tumors. Linked color imaging (LCI) is a newer IEE technology that not only the benefits detection but also aids in the assessment of mucosal inflammatory status. Other novel imaging modalities, such as texture and color enhancement imaging (TXI) and red dichromatic imaging (RDI), have been developed and used in clinical practice. In addition, endocytoscopy, which is a contact-type optical endoscope that allows in vivo cellular observation, has been developed. Meanwhile, artificial intelligence (AI) has provided real-time diagnostics with advanced endoscopic imaging.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
