Recent Advances of Endoscopic Ultrasound in Diagnostics and Therapeutics

Message from the Guest Editor

This Special Issue of "Recent Advances of Endoscopic Ultrasound in Diagnostics" focuses on the remarkable progress made in the utilization of endoscopic ultrasound (EUS) for diagnostic applications. This edition highlights the innovative techniques and advancements in EUS imaging that have significantly improved the detection, characterization, and staging of various gastrointestinal and pancreaticobiliary diseases. Key advancements include the development of high-resolution probes, enhanced imaging modalities such as elastography and contrast-enhanced EUS, and the integration of EUS with other diagnostic modalities like confocal laser endomicroscopy. These advancements have enabled more precise diagnosis of malignancies, inflammatory processes, and other pathological conditions. This Special Issue also explores the challenges and limitations in EUS diagnostics, as well as future directions for continued improvement in this evolving field.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
