Application of Advanced MRI Techniques in Multiple Sclerosis

Message from the Guest Editor

Multiple sclerosis is a chronic and often disabling disease of the central nervous system. [According to the National Multiple Sclerosis Society](#), more than 2.8 million people are living with MS. MRI plays a key role in the diagnosis and monitoring of this disease. Advanced neuroimaging techniques can provide essential information on the structural, functional or metabolic changes occurring in MS patients. The new MRI scanners are now equipped with advanced sequences. Thus, the correct use of the advanced sequences and the understanding of the advanced techniques information assume an increasingly important role in multiple sclerosis. This Special Issue will focus on the advancements and practical utility of advanced magnetic resonance imaging in the management of MS patients. We welcome high-quality original studies, meta-analyses and reviews addressing relevant aspects of the aforementioned topic.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
