Progress in the Forensic Diagnosis

Message from the Guest Editors

Forensic medicine came about with the formation of human society, and continues to be an indispensable medical subject. After World War II, forensic medicine made great progress with the introduction of blood typing. In recent years, diagnostic techniques have been further advanced by the introduction of DNA typing and CT machines. This Special Issue aims to gather reports that will help to progress forensic diagnosis in the following fields:

- Pathology
- Odontology
- Radiology
- Anthropology
- Toxicology
- Body fluid analysis
- DNA analysis
- Traffic science
