Advances in Fungal Infections: Special Issue in *Diagnostics* Journal

Message from the Guest Editors

Fungi are ubiquitous in the environment and occur as commensals in the flora of mucosal surfaces of mammalian tissues. Fungal infections, however, cause severe morbidity and mortality, particularly in immunocompromised patients and seriously ill patients. In fact, some epidemiologists have even projected that a fungus may be the next cause of a pandemic after COVID-19. In order to be prepared to stop or contain the potential havoc that fungi may cause, it is important to understand the emerging epidemiological patterns, the mechanisms underlying their microbiology, the drug-resistance mechanisms, to discuss all available techniques for diagnosis and treatment, and to explore new diagnostic and therapeutic interventions. It is also important that the different disciplines that work on different aspects of fungi pull their resources and expertise together to overcome the current and potential threat posed by the infection.

Guest Editors

Dr. Alfred O. Ankrah

Prof. Dr. Andor W.J.M. Glaudemans

Prof. Dr. Mike M. Sathekge

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
