Endometriosis, Adenomyosis and Gynecologic Cancer: Diagnosis and Management

Message from the Guest Editor

Endometriosis and adenomyosis are complex diseases with economic implications that cause abdominal and pelvic pain, infertility, dyspareunia and decreased quality of life. The diagnosis and management of endometriosis and adenomyosis and the determination of their malignancy require tools with high sensitivity and specificity. New sensitive, specific, accurate and reliable technologies that can be implemented using high-throughput mechanisms are essential. For this Special Issue, we encourage authors to contribute manuscripts that describe the current state of research on endometriosis and adenomyosis and predictive factors for their malignancy, with a focus on similarities in the patterns of behavior and pathogenesis of endometriosis and cancers. Additionally, studies of clinical, molecular, imaging, genetic and histopathological markers for better prediction of malignant transformation in endometriosis or adenomyosis, as well as discussions of how those markers can be used in clinical practice and in therapy, are encouraged.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
