Diagnosis and Management in Oral and Maxillofacial Surgery

Message from the Guest Editor

The Special Issue titled “Diagnosis and Management in Oral and Maxillofacial Surgery” aims to highlight recent advancements in the diagnosis, evaluation, and management of conditions affecting the head and neck region. This collection aims to present innovative diagnostic methodologies, including artificial intelligence-assisted imaging, molecular diagnostics, and 3D visualization techniques, that enhance accuracy in detecting pathologies such as maxillofacial trauma, temporomandibular disorders, oral malignancies, and congenital disorders. Furthermore, this issue will cover innovative management strategies ranging from minimally invasive procedures to complex reconstructive techniques utilizing patient-specific implants, 3D printing, and virtual surgical planning. Emphasis will be placed on integrating interdisciplinary approaches, including regenerative medicine and advanced biomaterials, to optimize functional and esthetic outcomes. By bringing together expertise from various subspecialties, this Special Issue aims to provide a comprehensive perspective on how modern diagnostics and tailored management strategies improve patient care in oral and maxillofacial surgery.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
