

## Special Issue

# Artificial Intelligence in Medical Images: New Challenges and Future Perspectives

### Message from the Guest Editors

Artificial Intelligence (AI) has been increasingly used in medical imaging to improve diagnostic accuracy, reduce interpretation time, and enhance patient outcomes. AI algorithms can analyze medical images such as X-rays, CT scans, MRI scans, and ultrasound images, as well as provide valuable insights for clinicians. The main applications of AI in medical imaging are image analysis, image segmentation, and image registration. The use of AI in medical imaging has the potential to improve patient outcomes by providing more accurate and timely diagnoses, guiding treatment decisions, and reducing the burden on clinicians. However, there are also challenges associated with implementing AI in clinical practice, such as ensuring the accuracy and reliability of the algorithms and addressing issues related to data privacy and security. This Special Issue will explore, but is not restricted to, the following topics:

- Machine learning algorithms for medical image analysis;
- Use of AI in pathology and histology for image analysis;
- Applications of AI in radiology and diagnostic imaging.

### Guest Editors

Prof. Dr. Manuel Graña

Computational Intelligence Group, Computer Science Faculty,  
University of the Basque Country, UPV/EHU, 20018 San Sebastián,  
Spain

Prof. Dr. Carlos M. Chiesa-Estomba

Department of Otorhinolaryngology-Head and Neck Surgery, Hospital  
Universitario Donostia, San Sebastian, Spain

### Deadline for manuscript submissions

closed (31 March 2024)

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
