An Update on Radiological Diagnosis in 2024

Message from the Guest Editors

The radiological diagnosis landscape has undergone profound transformations, evolving significantly through technological advancements and the integration of artificial intelligence. These enhancements not only redefine diagnostic accuracy but also augment the radiologist's role in clinical decision-making as of 2024. This SI aims to provide a comprehensive update on the current state of radiological techniques, focusing on recent innovations in imaging technologies, the application of machine learning algorithms, and their implications for patient care. By examining cutting-edge developments in hardware and software and their synergistic interactions, we will explore how these advancements contribute to improved diagnostic precision and patient outcomes. Furthermore, this review discusses the ethical considerations and challenges that accompany the implementation of AI in radiology, highlighting the need for balanced integration of technology in healthcare practices. Through this analysis, we aim to elucidate the pivotal changes in radiological practices, emphasizing their impact on both medical professionals and the healthcare system at large.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
