# Hip Disease: Diagnosis, Treatment, and Management

### Message from the Guest Editors

As the average life expectancy has increased over the last decades, doctors now often have to provide care for patients who suffer from several comorbidities. When treating fractures, especially geriatric traumatic hip fractures, the greatest challenges for physicians are the appropriate preparation of the patient for the operation, which often requires special examinations, the complication-free execution of the operation, as well as the management of osteoporotic bone conditions followed by initiation of a targeted rehabilitation. Often, surgical care has to be provided but, unfortunately, is followed by relatively high mortality rates in elderly patients. To provide a high standard of care and lower mortality risks, it is crucial to individually address each patients' needs. One diagnostic aspect that is easily accessed—but often underestimated in its importance—is correct and detailed imaging to allow precise planning of treatment strategies and surgical interventions. To lower overall risks for patients, a gold standard for this process should be established. For this purpose, I cordially invite all authors to submit original articles on this topic.

### Guest Editors

Prof. Dr. Harald Kurt Widhalm

Clinical Division of Traumatology, Department of Orthopedics and Traumatology, Medical University of Vienna, Waehringer Guertel 18-20, 1090 Vienna, Austria

Dr. Nikolaus W. Lang

Consultant for Orthopaedics & Traumatology, Medical University of Vienna, Department of Orthopaedics and Trauma Surgery, General Hospital Vienna, Waehringer Guertel 18-20 A-1090 Vienna, Austria

### Deadline for manuscript submissions

closed (31 January 2021)

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
