

Special Issue

Role of Imaging in the Detection, Management, Histopathological Correlations

Message from the Guest Editors

This Special Issue is dedicated to the problems that we are facing when diagnosing the location and size/stage of the lesion and its histological nature. One of the most important factor before taking a decision on the disease treatment (surgery, or radiotherapy/chemotherapy alone, or chemoradiotherapy) is as accurate as possible diagnosis. The value of imaging is indisputable, if one takes into consideration all modern modalities of ultrasonography, computed tomography, magnetic resonance imaging and positron emission tomography. Histopathological assessment of the tumor tissue is always the final diagnosis, that can confirm clinical and radiological findings. Thus our efforts are focused on the use of the most effective imaging techniques that could correlate to the highest degree with the final diagnosis. Authors are invite to present their investigation results on these problems in correlation with clinical practice, image -guided treatment procedures, and new perspectives in applying imaging and histopathology in oncological and non-oncological diagnostics.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
