Artificial Intelligence Revolution in Chronic Inflammatory Diseases: Diagnosis, Prognosis, and Future Perspectives

Message from the Guest Editors

Chronic inflammatory diseases represent a significant global health challenge, requiring innovative approaches to improve diagnosis, prognosis and personalized therapeutic strategies for each patient. In this context, artificial intelligence (AI) represents an important recent resource in reshaping our understanding and management of chronic inflammatory diseases, both cutaneous and systemic. The proposed collection of articles will delve into the latest advances in the applications of AI for an early and accurate diagnosis of these diseases in order to guarantee timely therapeutic interventions. AI-based prognostic models, which integrate multiple data sources, will be studied for their potential to predict disease progression, and personalize treatment plans. Furthermore, the goal of this Special Issue is to address the evolving landscape of AI in chronic inflammatory diseases, offering insights into the ethical considerations, challenges, and regulatory aspects associated with the implementation of AI technologies in clinical practice.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
