

## Special Issue

# Diagnosis and Prognosis of Endometriosis

### Message from the Guest Editor

The accurate diagnosis of endometriosis is crucial for effective management, while its recurrence poses a considerable clinical dilemma. The diagnosis of endometriosis typically involves a combination of clinical evaluations, imaging studies, and invasive procedures, such as a laparoscopy with histological confirmation. Clinical manifestations, such as chronic pelvic pain, dysmenorrhea, dyspareunia, and infertility, often raise suspicion for endometriosis. Transvaginal ultrasound and magnetic resonance imaging have emerged as valuable, non-invasive imaging modalities for detecting endometriotic lesions, particularly in deep pelvic locations. However, their sensitivity and specificity vary depending on lesion size and location. Laparoscopy remains the gold standard for obtaining a definitive diagnosis, allowing for direct visualization and biopsy of endometriotic lesions. The recurrence of endometriosis following a surgical or medical intervention remains a significant clinical challenge.

This Special Issue will be focused on Diagnostic Methods and Prognosis management of Endometriosis, welcome to contribute!

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
