Diagnostic Imaging in Multiple Sclerosis

Message from the Guest Editor

The correct classification and management of patients with multiple sclerosis requires the adoption of several methods for biomarker detection, and magnetic resonance imaging is among the most relevant. The evolution of neuroimaging techniques in the field of multiple sclerosis has allowed for more precise diagnosis and more accurate therapeutic monitoring. In addition to conventional magnetic resonance imaging techniques, advanced techniques are increasingly entering the clinical field, offering greater possibilities in the evaluation of patients with multiple sclerosis. To appropriately address patients with multiple sclerosis, it is necessary to deepen the knowledge on the physiopathological mechanisms, and magnetic resonance imaging can help for this objective.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
