

Special Issue

Leading Diagnosis on Chest Imaging

Message from the Guest Editor

The aim of this Special Issue is to provide an overview of recent technical developments in chest imaging and their clinical relevance, with a special focus on spectral CT imaging and MR imaging. In this context, original articles, review articles, and case reports based on novel imaging algorithms and methods will be included. Technologies such as spectral imaging, including dual-energy CT and photon-counting CT, radiation dose reduction algorithms, and possibilities for contrast media reduction, will be covered in this Special Issue. In the first part, technical articles will focus on general principles and methods with a special focus on spectral CT imaging and MR imaging. In the second part, clinical studies will evaluate and demonstrate the clinical relevance of novel imaging technologies, methods, and algorithms for various different anatomical regions/diseases in the chest. Finally, a discussion among 2–3 experts in the field will summarize and interpret the findings of this Special Issue, also regarding future developments and their potential.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
