Advancements on Diagnostic and Management of Liver Disease

Message from the Guest Editor

Recent advancements in the diagnostics and management of liver disease have led to a remarkable expansion of the field of hepatology. By the development of omics and artificial intelligence technology, precision medicine is now beginning to be integrated into clinical practice. However, unmet practical needs are still present in diagnosing the various phenotypes of chronic liver disease and molecular subtypes of hepatocellular carcinoma. In this Special Issue, original research articles, reviews, short communications, case reports and interesting images are welcome, as well as either clinical or basic research. We look forward to your contribution.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
