Special Issue

Respiratory Diseases: Diagnosis and Management

Message from the Guest Editors

There has been tremendous progress in the management of respiratory diseases in recent years, pulmonary and respiratory medicine is moving towards personalized medicine. A plethora of studies have led to an improved understanding of the pathophysiology of COPD, allowing us to contemplate how to promote its prevention and possibly change the disease course. Thoracic oncology is a constantly evolving field. Current technologies allow for screening at-risk individuals to detect early-stage lung cancer. Molecular studies of neoplasms have led to targeted therapies, which can change the outlook of patients with advanced as well as local malignancy. Additional significant advances have led to progress in the diagnosis and management of respiratory infections, interstitial lung diseases and pulmonary fibrosis, pulmonary hypertension, and hereditary diseases such as cystic fibrosis and primary ciliary dyskinesia, to name a few. With this Special Issue, we aim to provide readers with an updated overview of exciting novelties in respiratory medicine and promote interest and discussion in this field.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
