Gastrointestinal Endoscopy: Diagnostic Applications and Safety Evaluation

Message from the Guest Editors

Gastrointestinal endoscopy plays a key role in the diagnostic workup of digestive tract diseases. With the evolution of endoscopic technologies and imaging systems, diagnostic accuracy has drastically improved, enabling earlier detection and more refined characterization of gastrointestinal pathology. We invite submissions that investigate innovative diagnostic techniques, risk stratification tools, safety protocols, and performance metrics related to endoscopic procedures. Studies focused on procedure-related complications, quality assurance, and strategies to enhance patient safety are strongly encouraged. Topics of interest include evaluation of diagnostic accuracy and effectiveness of emerging endoscopic technologies, risk assessment models and preventive approaches for endoscopy-related adverse events, safety outcomes of endoscopic procedures across diverse patient populations, comparative studies on sedation protocols and infection control measures, integration of artificial intelligence and machine learning in diagnostic decision-making, and endoscopic surveillance strategies and their clinical impact.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
