Diagnosis and Management of Systemic Sclerosis in 2023

Message from the Guest Editor

Systemic sclerosis is a devastating life-threatening autoimmune disease characterized by progressive vasculopathy, fibrosis, and immune dysregulation. Recently, experts in the field have utilized point-of-care tools as ways to diagnose patients with early systemic sclerosis, and to potentially monitor responses to treatment. With this, many experts have paid close attention to patients with very early diagnosis of systemic sclerosis (VeDoSS). There have also been various groups that have utilized combination therapies to treat VeDoSS patients. In this Special Issue, we would like to invite submissions that discuss various point-of-care tools that are utilized for risk stratifying VeDoSS patients, with an emphasis on how these tools are used to measure certain aspects of the pathogenesis. Similarly, we would also like to invite submissions that discuss the utility of combination therapies in SSc and how treatment using point of care tools is monitored, with an emphasis on how these approaches are utilized to improve and detect the various aspects driving the pathogenesis of SSc.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
