Advances in the Diagnosis and Management of Vasculitis

Message from the Guest Editor

Research in the field of primary systemic vasculitides is an evolving topic. Advances in their diagnosis and management are quickly improving patient outcomes. In recent years, less invasive imaging studies have become available to assist with the diagnosis and treatment guidance of vasculitis, especially for those with large-vessel involvement. Advances in the understanding of immunopathogenesis, the search for biomarkers, the increased recognition of steroids' toxicity, and the increased interest in clinical trials have advanced the use of targeted therapies that have revolutionized the management of vasculitides. To keep up with these advances, this Special Issue is dedicated to updates on the diagnosis and management of primary systemic vasculitides. Proposals in agreement with this broad topic are welcome. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: imaging studies on vasculitis, biomarkers, treatment approaches, patient outcomes, and epidemiologic studies. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
