Advances in Optical Coherence Tomography in 2025

Message from the Guest Editor

Optical coherence tomography (OCT) is an imaging technique that utilizes low-coherence light to capture structural images of biological tissue at a high resolution at the micrometer scale. OCT has had a significant impact on the diagnosis and management of diseases in many fields of medicine. Since the first demonstration of Doppler optical coherence tomography (OCT) in 1997, several functional extensions of OCT have been developed, including velocimetry, angiogram, and optical coherence elastography (OCE). These functional techniques have been widely used in research and clinical applications, such as ophthalmology and dermatology. This Special Issue focuses on the challenges of and recent advances in functional OCT in disease diagnosis and clinical translation. Contributions may address, but are not limited to, the following topics: artificial intelligence in functional OCT, advancements in endoscopic functional OCT, functional OCT-guided therapy, and OCT-based multimodal imaging.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
