MRI in Prostate Cancer: New Evidences and Future Perspectives

Message from the Guest Editor

Advances in MRI have enabled a paradigm shift in the diagnosis and management of prostate cancer. Multi-parametric MRI (mp-MRI) of the prostate is now routinely used to guide biopsy, avoid unnecessary biopsies and reduce the number of insignificant cancer diagnoses.

Strategies for using mp-MRI to provide the best management outcomes are developing. Whole-body MRI is also implemented in expert centres for metastatic disease staging. New advances in MRI methods that can now evaluate tissue microstructure in more detail and provide real-time metabolic information on cancer. In this special issue we highlight ongoing research in the field of prostate MRI, both technological advances and also their implementation within clinical pathways.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
