

Topical Collection

Medical Optical Imaging

Message from the Collection Editor

Medical optical imaging includes a variety of techniques that use light to obtain images from inside the human body. Examples include optical microscopy, spectroscopy, endoscopy, scanning laser ophthalmoscopy, laser Doppler imaging, and optical coherence tomography. This Topical Collection aims to bring together scholars, professors, researchers, and administrators from around the world to use state-of-the-art technologies and concepts to significantly improve the field of medical optical imaging.
