Advances in Musculoskeletal Imaging

Message from the Guest Editor

Musculoskeletal disorders are currently one of the fastest-growing areas in diagnostic radiology, fueled in no small part by the vast amount of imaging studies of the skeletal system that occur every day. Therefore, many applications of artificial intelligence are focused on musculoskeletal changes as well. However, advances in device technology are also being made, including CT-like images in MRI, dual-energy CT, and especially photon-counting detectors as well as relentless efforts to reduce X-ray exposure while maintaining image quality. In ultrasonography, new generations of probes as well as AI-assisted post-processing techniques are helping to achieve unprecedented image quality. Given all the progress in the field, what efforts are being made to communicate all these technical innovations to the general radiologist and referring disciplines? This Special Issue aims to bridge the gap between high-quality research in imaging diagnosis of the bone and joints to the practical application of this knowledge in our patients, who should always be the focus of our academic work!

Guest Editor

Prof. Dr. Kay Geert A. Hermann

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
