Advances in Breast Diagnostics

Message from the Guest Editors

Technological advances such as AI have many potential applications in medicine, with the ability to improve the speed and accuracy of diagnoses and generate prediction models that can help guide treatment and promote precision medicine. Specifically, machine learning allows the amalgamation and analysis of large amounts of data, enabling more accurate diagnoses and the prediction of outcomes, such as recurrence-free survival, pathologic complete response (pCR), and the prediction of prognosis in breast cancer. This can help to promote more individually tailored treatment strategies with the goal of achieving improved outcomes. Incorporating novel imaging and non-imaging biomarkers in machine learning analyses may further enhance the prediction of outcomes. The goal of this Special Issue is to showcase the latest advancements and emerging trends in the application of AI methods for breast cancer detection and outcome prediction. We are pleased to invite you to submit your work to this Special Issue and look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
