Imaging Diagnosis and Management of Head and Neck Cancer

Message from the Guest Editors

Head and neck cancer (HNSCC) is one of the most frequent malignancies and has an overall poor prognosis, with a 5-year survival rate of 50% and a rising incidence. At present, imaging modalities play an important role in tumor diagnosis and treatment response evaluation in daily clinical routine.

However, imaging modalities might not only provide information about tumor localization and possible metastatic sites but also provide information regarding tumor microstructure and could help in predicting treatment response for surgery or radiotherapy approaches.

Therefore, with this Special Issue, we would like to focus on the role of imaging for diagnosis and treatment management purposes and the diagnostic capability of novel imaging analysis techniques in HNSCC. Papers regarding radiomics, treatment, and survival prediction are welcomed in this Special Issue to improve the important role of imaging modalities in HNSCC.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
