New Progress in Diagnostics of Clinical Hypertension

Message from the Guest Editors

Hypertension is a leading global health disease burden, and its prevalence is anticipated to increase with an aging population. Hypertension is known to cause end organ damage and is an independent risk factor for a myriad of chronic cardiovascular, renal, and peripheral vascular diseases. Despite extensive research and intervention, there remains shifting goal posts for blood pressure management targets, especially in the setting of advanced age or complex comorbidities. Indeed, the diagnosis of hypertension reflects more than just the measurement of systolic or diastolic blood pressure. Clinical and diagnostic parameters to help to understand the entire vascular tree and global vascular load are of renewed importance. In this Special Edition, we invite papers on innovative methods to diagnose hypertension, blood pressure targets across age groups, as well as novel diagnostic strategies to assess global vascular load.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418).

Diagnostics is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
