Novel Approaches in Oncologic Imaging

Message from the Guest Editors

The early and accurate detection of malignant lesions is essential for a modern targeted therapy in oncology. Modern radiology offers various diagnostic procedures for detecting cancer and monitoring patients during therapy. Recent developments in radiology, including the use of artificial intelligence and imaging biomarkers, as well as the widespread use of hybrid imaging techniques, have already shown promising results for improving oncologic imaging and individualizing patient management. Novel insights are needed in order to accelerate the implementation of these techniques into clinical routine. Furthermore, the economic aspects of these modern approaches are becoming increasingly important. The aim of this Special Issue is to present recent developments and novel approaches in diagnostic oncologic imaging, covering insights from recent technical developments, including artificial intelligence and imaging biomarkers, to specific imaging techniques, thus adding value for clinical and economic oncology patient management.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
