Multimodal Cardiac Imaging: Diagnostic and Prognostic Advances

Message from the Guest Editors

In recent years, the development of imaging techniques, together with the greater availability of equipment, has improved cardiovascular prevention by enabling faster and more accurate diagnosis. Specifically, advanced echocardiography (transthoracic and transesophageal), state-of-the-art CT scans, and the increased availability of cardiac MRI, as well as nuclear imaging techniques, enhance diagnostic accuracy owing to the possibility of a multimodal approach. The aim of this Special Issue is to describe the role of cardiac imaging modalities and advances in this field in evaluating the diagnosis and prognosis of cardiovascular disease, including coronary artery, valvular, cardiac, and vascular diseases, to aid clinical cardiologists and improve clinical practice.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
