Applications of Optical Coherence Tomography in the Ocular Diagnosis: From the Tear Film to the Sclera

Message from the Guest Editors

The latest technological developments have radically impacted the daily practice of ophthalmologists thanks to the advent of novel diagnostic tools that facilitate an early diagnosis and provide a better management of ocular disorders. Optical Coherence Tomography (OCT) and OCT Angiography (OCTA) have acquired key roles in developing a better understanding of the pathogenesis of several ocular conditions, moreover, they have remarkably changed the diagnostic approach to many ophthalmic and systemic diseases.

This Special Issue aims to create a multidisciplinary forum of discussion about the clinical and research applications of these technologies (OCT and OCTA) in the ocular diagnosis of different subfields of ophthalmology. Innovative applications of optical coherence tomography in every ophthalmic field will be very welcome. Submissions are welcome primarily for high-quality original research articles showing new developments and innovative findings about these topics. Secondly, we will consider high-interest review articles and case series of exceptional merit.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
