Advances in Oral and Maxillofacial Radiology

Message from the Guest Editors

In recent years, many new technologies and applications of oral and maxillofacial radiology have emerged. The main purpose of this evolution was to develop accessible digital imaging diagnostic systems with minimal irradiation. Additionally, the design of programs used to simulate treatment plans has improved dental medical services. Oral and maxillofacial imaging offers advantages in terms of improved diagnoses and treatment quality. Artificial intelligence (AI) has started to play an especially important role, as many original research reports have been published to describe its various applications, such as disease diagnosis and surgical planning. The 3D imaging and modalities involving ionizing (e.g., CT and CBCT) and non-ionizing radiation (e.g., MRI and ultrasound) are continuing to develop and take on more important roles in clinical practice than before. This Special Issue will be dedicated to review and original articles, emphasizing the involvement of current imaging techniques in oral and maxillofacial radiology for diagnosis, planning, treatment, as well as in potential innovative research.

Guest Editors

Prof. Dr. Danisia Haba

Department of Oral and Maxillofacial Surgery, Faculty of Dental Medicine, "Gr. T. Popa" University of Medicine and Pharmacy, 16 Universitatii Str., 700115 Iasi, Romania

Dr. Alexandru Nemțoi

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
