Advances in the Diagnostics of Osteoarthritis

Message from the Guest Editor

Osteoarthritis is one of the most common diseases of the musculoskeletal system affecting individual patients and healthcare systems worldwide. The diagnostics of osteoarthritis is mainly based on medical history, clinical examination and conventional radiographs. These diagnostic measures have not changed for decades. Recent advances in medical technology might influence the diagnostics and future treatment of OA. This Special Issue focuses on current and potential future diagnostic methods from clinical examination to computer-based diagnostic algorithms.

Guest Editor

Dr. Lukas A. Holzer

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
