Advance in the Diagnostics of Ovarian Neoplasms

Message from the Guest Editors

Ovarian neoplasms represent a broad and heterogeneous group of tumors with marked differences in nature of neoplasms (epithelial, stromal-cordonal, and germinal) and biological behavior (benign, borderline, and malignant), including the most clinical aggressive cancers in the gynecological field. Ovarian neoplasms involve a broad range of ages, from childhood to old age. A precise diagnostic assessment is necessary to define a specific treatment approach, with particular attention to sparing fertility in young patients when possible. A multidisciplinary diagnostic approach including the main medical figures, such as pathologists, radiologists, oncologists, and gynecologists, is strongly desirable to reach this aim. This Special Issue of *Diagnostics* will focus on articles concerning a range of topics on ovarian neoplasms including pathological classification, molecular analysis, identification of predictive and prognostics biomarkers, new advances in diagnostic techniques, and clinical approaches.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
